

MR BARRANT

I am sorry Mr Tomdick, Columbus never reached the American Continent, it is an Italian lie!! He only reached by coincidence the Isle of San Salvador!!!!

MR TOMDICK

In that case you would still be wrong, because it was Amerigo Vespucci to reach the main Land continent!!

MR BARRANT

I am sorry, you are wrong again!! Vespucci claimed to have reached the main Land!! His story could not be confirmed!!! It's another Italian lie!!! The true Navigator to discover the new continent, now called America, was the great ENGLISHMAN, JOHN CABOT.
Please read The Encyclopaedia Britannia!!!

MR TOMDICK

But he was also ITALIAN!! His true name was Giovanni Caboto!! He was born in Genoa Italy!!

MR TOMDICK

Final answer

MR BARRANT

If you had said C. You would have lost £200 Pounds. However if you had said A, you would have won £200! I am so sorry better luck next time!

MR TOMDICK

But that's not True!!! Leibniz wrote the Calculus in 1684!!! 3 years before Newton could copy it and then publish it, in 1687!!!

MR BARRANT

Liebnitz sued Newton in an English Court!! Newton was the Minister of Justice at that time, and he got an independently committee (made all of his friends) and he made himself the head of that committee!!! Liebniz was found guilty after Newton himself wrote the final judgement of the Trial!!!! So I am afraid you are wrong again! Read Britannica!!! Better luck next time.
